HAZARD AND RISK ASSESSMENT

Potential Hazards and Risks:

Travel:

By private vehicle or Public Transport. Observe Rules of the Road and Public Transport Rules and Regulations.

Parking is on a public road. When walking to the Museum be aware of traffic. Use the pavements and be careful crossing the road. Also watch out for any trip hazards such as kerbs and loose pavement slabs.

Museum:

The information to hand is that access is very easy. There are no steps and it is a flat entrance from the outside pavement. There is space for someone on a mobility scooter providing there are not too many people in the museum area (less than 20). There is a disabled parking space right outside the museum which could be reserved but the museum cannot guarantee this.
